

A Day at the Ranch

The purpose of the day is to inspire individuals and organizations to take action that helps TomKat Ranch advance its mission of raising healthy food on working lands in a way that regenerates the planet and inspires others to action.

We invite you to join us for fun and discovery in a classroom like no other! **The Day at the Ranch** is a hands-on program created to share powerful and useful lessons and insights from the natural world with those who are working to care for it. Working closely with horses and nature, this one-day course is designed to illuminate connections between healthy lands, food, people, and communities and empower leaders in social impact, environmental stewardship, education, agriculture, energy, and more to work productively together to change the world in a sustainable, regenerative way.
